

Revolutionary MicroSpring™ textile offers breathability, moisture transfer and anit-microbial protection not possible with gels, foams or fleece.

Microfilaments flex to reduce pressure on bony prominences such as the heel, elbow, vertebra and trochanter. Layers of MicroSpring Textile puts up to 20 thousand microfilaments per square inch to act as mini pressure relieving springs.

- ◆ Superior skin pressure and shear relief
- ◆ Breathable - fabric and filament layers allow air flow
- ◆ Moisture wicking - allows moisture transfer
- ◆ Can be washed and tumble dried up to 95°C (200°F) for infection control and allows for multi-patient use
- ◆ Durable - will not flatten out or become flaky
- ◆ Stretchy knit (not woven) fabric has "give" to reduce surface friction
- ◆ Anti-microbial - will not support growth of bacteria
- ◆ Compatible with topical creams and ointments
- ◆ Latex free - 92% polyester, 8% spandex
- ◆ CA117 Flame Resistant

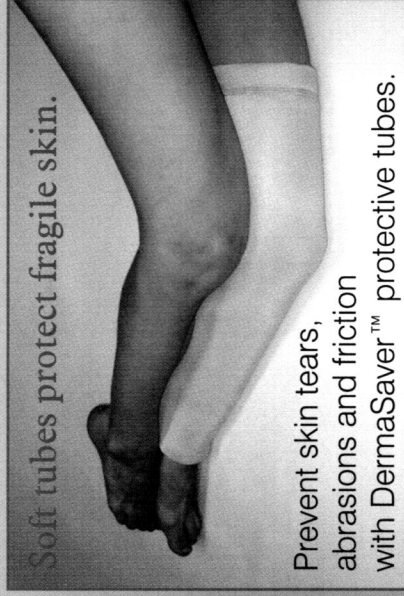

**Breathable  
Pressure Relief**

Revolutionary MicroSpring™ textile offers breathability, moisture transfer and anit-microbial protection not possible with gels, foams or fleece.

New! From the *HipSaver* people.  
**DermaSaver™**  
Breathable Pressure Relief

Revolutionary multi-layered MicroSpring™ textile replaces foam and gel surfaces. Allows for self-supporting, loose fitting arm and leg protectors.

Soft tubes protect fragile skin.

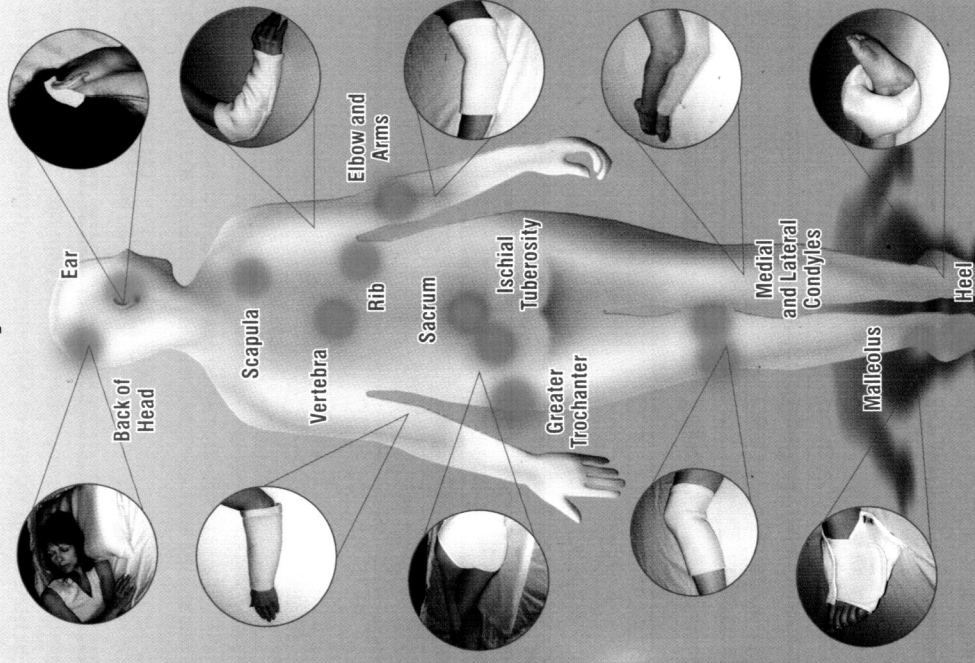

Prevent skin tears, abrasions and friction with DermaSaver™ protective tubes.

DermaSaver™ SkinTubes unique patent pending MicroSpring Textile construction creates a loose-fitting, non-constricting, flexible sleeve which holds its shape. SkinTubes won't bunch up or slip down.

**Available from:**

Head to toe  
only from...  
**DermaSaver™**  
Breathable Pressure Relief

Unlike foams, gels, fleece and polyfil DermaSaver™ reduces ALL of the conditions that cause skin breakdown. Protect all these areas that are vulnerable to pressure sores.

Breathable. Anti-microbial. Durable. Washable.

## SkinTubes™ Skin Pressure Relieving Skin Protection for Arms and Legs.

Two layers of soft, lightweight MicroSpring Textile™ form a loose fitting tube that stays in place to protect fragile skin from pressure, friction and minor traumas that result in tears, bruising and minor abrasions. Unlike commercial sleeves and stockings, which are tight and binding, the layers of microfilaments allow air-flow and moisture transfer. Unlike foams gels and fleece, DermaSaver™ reduces ALL of the conditions that cause skin breakdown. Simply slip the tube over the arm or leg, there are no hook and loop fasteners or tight fitting spandex. The narrower end of the tube gently rests on the ankle or wrist to keep it from falling off. The cross microfilaments in the MicroSpring Textile allows these soft tubes to be self-supporting so they won't slip down or bunch up.

All base layers of the SkinTubes™ are protected by the Aegis Microbe shield which uses an EPA registered antimicrobial technology to inhibit the growth of micro-organisms on the product. All SkinTubes™ can also be completely washed and tumble dried up to 95°C (200°F).

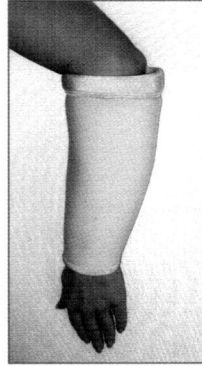

### SkinTube™ for Arms.

Two layers of MicroSpring Textile protect fragile skin from friction and pressure that cause tears, bruising and minor abrasions.
